## RESEARCH INTERESTS

**AI for Health Time Series:** Designing algorithms and benchmarks with strong empirical performance, including large language models (LLMs), for time series derived from medical records, wearable health devices, and digital health platforms. Also exploring foundation models for biological sequences such as amino and nucleic acids for genomics and drug discovery.

## WORK EXPERIENCE

**Lawrence Livermore National Laboratory** Aug. 2024 – Present  
*Machine Learning Researcher*

Working on two domains: (i) developing foundational models for bio-sequences (DNA, RNA, and proteins) and (ii) modeling health records to uncover temporal patterns in patient histories. The EHR project involves modeling sequential and time series data to analyze trends in patient conditions over time. Both projects focus on genome and health data analysis, evaluating genomic foundation models, and training large-scale models on GPU clusters, including national lab supercomputers.

**University of Washington** Apr. 2023 – May 2024  
*Postdoctoral Researcher in Paul G. Allen School of Computer Science*

As a member of the Behavioral Data Science group, I designed language models that can *understand* and *reason-with* medical time-series data, including text. I also worked on defending LLMs against a wide range of hijacking and prompt-injection attacks.

**IBM Research** Aug. 2022 – Mar. 2023  
*Research Scientist*

With the Data & AI team, I worked on enabling Watson-Core to perform business intelligence tasks such as data denoising, feature aggregation, etc., using only text commands over IBM cloud.

**Amazon** Jan. 2022 – Jun. 2022  
*Applied Scientist-II Intern*

Analyzed purchase records of Amazon Pay customers to model user-item preferences and forecast future purchases, enabling personalized coupon recommendations at optimal times.

**Siemens Healthcare** May 2016 – Jan. 2017  
*Research Intern*

Developed computer vision models, such as super-resolution on video frames, to enhance radiographic imaging quality in Siemens Multimobil 5C X-Ray equipment.

## EDUCATION

**Indian Institute of Technology (IIT) Delhi**  
*Ph.D. in Computer Science & Engineering.*  
Institute Nominee for ACM SIGKDD and ACM India Doctoral Dissertation Awards.

**Indian Institute of Information Technology (IIIT) Jabalpur**  
*B.Tech. in Computer Science & Engineering.*

## AWARDS AND HONORS

|                                                                                            |      |
|--------------------------------------------------------------------------------------------|------|
| Spotlight Award at NeurIPS - Top 5% of all submissions.                                    | 2024 |
| NASSCOM AI Game-Changers of India: Runner-Up in ML Fundamentals Category.                  | 2022 |
| Expert Talk at IndiaAI: Organized by NASSCOM and Ministry of IT – Govt. of India.          | 2022 |
| Microsoft and Google (Declined) Travel Grant to attend ACM SIGKDD.                         | 2022 |
| Outstanding Doctoral Paper Award: The First Intl. Conference on AI-ML Systems.             | 2021 |
| ACM SIGIR Student Grant for CIKM.                                                          | 2021 |
| Siemens Healthcare R&D Tech-Intern Rating of 1 (Highest Possible).                         | 2017 |
| All India 9th Rank in ABU Asia-Pacific Robocon.                                            | 2015 |
| Project selected for 'Make In India' – Govt. of India's Flagship Manufacturing Initiative. | 2015 |
| A1 (Highest Possible) Grade for All Subjects and Merit Award in Senior High School.        | 2013 |

**Efficient and Responsible Adaptation of Large Language Models for Robust and Equitable Top-k Recommendations.**

K. Kaur, M. Chadha, **V. Gupta**, and C. Shah.

**SPML: A DSL for Defending Language Models Against Prompt Attacks.**

R. Sharma, **V. Gupta**, and D. Grossman.

**Differentiable Adversarial Attacks for Marked Temporal Point Processes.**

P. Chakraborty\*, **V. Gupta\***, R. Rahul, S. Bedathur, and A. De.

AAAI Conference on Artificial Intelligence (**AAAI**), 2025.

**Cost-Effective Biological Data Analysis via a Benchmark and Ensemble of Large Language Models**

**V. Gupta**, B. Bartoldson, J. Wakim, J. Allen, J. M. Marti, T. Chen, and B. Kailkhura.

U.S. Department of Energy Office of Scientific and Technical Information (**OSTI**), 2025.

(Internal lab research with limited public release.)

**Enhancing Biological Insights with Knowledge-Driven Multi-Modal RNA Models.**

M. Qiu, ..., **V. Gupta**, B. Bartoldson, B. Kailkhura, T. Chen.

U.S. Department of Energy Office of Scientific and Technical Information (**OSTI**), 2025.

(Internal lab research with limited public release.)

**Are Language Models Actually Useful for Time Series Forecasting?**

M. Tan, M. Merill, **V. Gupta**, T. Althoff, and T. Hartvigsen.

Neural Information Processing Systems (**NeurIPS**), 2024. (**Spotlight**)

**Language Models Still Struggle to Zero-shot Reason about Time Series.**

M. Merill, M. Tan, **V. Gupta**, T. Hartvigsen, and T. Althoff.

Empirical Methods in Natural Language Processing (**EMNLP**) Findings, 2024.

**Tapestry of Time and Actions: Modeling Human Activity Sequences using Temporal Point Process Flows.**

**V. Gupta** and S. Bedathur.

ACM Transactions on Intelligent Systems and Technology (**TIST**), 2023.

**Retrieving Continuous Time Event Sequences using Neural Temporal Point Processes with Learnable Hashing.**

**V. Gupta**, S. Bedathur, and A. De.

ACM Transactions on Intelligent Systems and Technology (**TIST**), 2023.

**Modeling Spatial Trajectories using Coarse-Grained Smartphone Logs.**

**V. Gupta** and S. Bedathur.

IEEE Transactions on Big Data (**TBD**), 2023.

**Teaching Old DB Neural Tricks: Learning Embeddings on Multi-tabular Databases.**

G. Gaur, R. Singh, S. Arora, **V. Gupta**, and S. Bedathur.

International Conference on Data Science & Management of Data (**CODS-COMAD**), 2023.

**Learning Temporal Point Processes for Efficient Retrieval of Continuous Time Event Sequences.**

**V. Gupta**, S. Bedathur, and A. De.

AAAI Conference on Artificial Intelligence (**AAAI**), 2022.

**ProActive: Self-Attentive Temporal Point Process Flows for Activity Sequences.**

**V. Gupta** and S. Bedathur.

ACM SIGKDD Conference on Knowledge Discovery and Data Mining (**KDD**), 2022.

**Modeling Continuous Time Sequences with Intermittent Observations using Marked Temporal Point Processes.**

**V. Gupta**, S. Bedathur, S. Bhattacharya, and A. De.

ACM Transactions on Intelligent Systems and Technology (**TIST**), 2022.

**Doing More with Less: Overcoming Data Scarcity for POI Recommendation via Cross-Region Transfer.**

**V. Gupta** and S. Bedathur.

ACM Transactions on Intelligent Systems and Technology (**TIST**), 2022.
